SYSTEM REQUIREMENTS

## — WHAT ARE THE SYSTEM REQUIREMENTS FOR GEFORCE NOW?

For the best gaming experience, we recommend the following hardware, software, and connectivity:

### Hardware Requirements

- NVIDIA SHIELD [Android TV](#), [portable](#), or [tablet](#)
- SHIELD controller or gamepad
- NVIDIA SHIELD-Ready 5 GHz Wi-Fi router. [View all routers](#).
- For cable internet subscribers NVIDIA recommends a DOCSIS 3.0 cable modem. Please contact your provider for a list of compatible modems.
- For DSL internet subscribers NVIDIA recommends a ADSL2+ or VDSL2 residential gateway.

### Software Requirements

- The latest version of the [SHIELD Hub app](#).

### Connectivity Requirements

- GeForce NOW streaming quality automatically adjusts to the speed of your broadband connection.
  - 10 Megabits per second – Required broadband connection speed
  - 20 Megabits per second – Recommended for 720p 60 FPS quality
  - 50 Megabits per second – Recommended for 1080p 60 FPS quality
- < 60ms ping time to one of six NVIDIA datacenters world-wide

If you are running a Windows PC, you can [test your network](#) to see if it is ready for GeForce NOW.

Test your network works on IE, Safari, Firefox, and Chrome (version 28 or higher).
